

connect to the Power of PI

“The OSIsoft Users Conference is THE best way to stay informed about PI System products, their current use and future plans. If given a choice, we would forego all other technical training if it meant we would still get to attend the Users Conference.”

Phyllis Withers, Duke Energy
Power Industry

MAY 12-14

OSIsoft Users Conference 2003: the event you don't want to miss
SAN FRANCISCO CALIFORNIA USA

Powerful consciousness happens at the extraordinary OSIsoft Users Conference. It's the place to be if you're serious about connecting to the most powerful information intelligence system in the world and learning how companies realize major benefit from it everyday. The Power of PI throughout your enterprise connects you with the real-time facts that your enterprise needs to prosper, the essential information you rely on for real world, bottom line business decisions every day.

“If you want to get more out of your existing investment, attend this conference. The entire conference is focused on exploring possibilities which are already proven by other users.”

Michael Simpson, Emerson Process Management
Process Control Service and Solution Provider

“The OSIsoft Users Conference brings representation from all process industries together to better understand how we can gain value from data.”

Adam Smyth, Dofasco, Inc.
Metals Industry

You need to be there

The OSIsoft Users Conference is for current and potential PI System users. People across all departments can learn how using PI can help them achieve better returns. High-level management is invited to discover how PI generates a better-run business with increased profits. IT professionals find this conference technically stimulating since the PI System offers a premier development environment with opportunity to custom fit PI to your needs. Operators learn how PI makes their process easier to view, manage and improve. Everyone who comes will take away knowledge about the PI System, our evolving computing world and how each individual throughout the enterprise can use PI connections to their advantage.

Share the knowledge

Since 1990, the OSIsoft Users Conference has provided the perfect venue for an exciting and valuable exchange of information, PI applications and cutting edge technology solutions. Hundreds of customers from all over the world in every industry come to share how they use PI to make their enterprises efficient, connected and more profitable.

Every single employee from OSIsoft is there to help you better understand how PI provides the most technologically advanced tools that make everyone's efforts within your company more effective. President and founder Dr. J. Patrick Kennedy and our team of visionary leaders present current achievements and future goals from OSIsoft and the state of our larger technological world. Developers make product presentations and are personally available for questions. Our entire team is dedicated to your success.

Attend this extraordinary event and change your world

Learn more about the OSIsoft Users Conference and register to attend or present on our Web site at www.osisoft.com. Contact Tom Coates at tlc@osisoft.com or 510-297-5818. Family members are welcome, and we have planned guest events.

"The real value is listening to and talking with other users on how they use information to add value for their company."

Alan Bopp, Eastman Kodak Company
Chemical Industry

"The conference is the place to meet all PI software developers in person and get your questions answered directly."

Sean Ireland, International Paper
Pulp & Paper Industry

"We (Shell) have used the OSIsoft Users Conference as an opportunity to meet with our counterparts from around the globe. We share ideas and best practices with them and others in our industry. I have always brought back new knowledge and ideas from every conference attended."

Eric Sanders, Shell E&P
Oil & Gas Industry

"OSIsoft Users Conference attendees gain the strategic and visionary knowledge needed to ensure that their company's resources have the best software available to continue optimizing their processes."

Doug Fisher, Genencor International, Inc.
Biotech Industry

"The OSIsoft Users Conference creates an environment that not only exposes new technologies, but fosters a learning environment between different companies and industries around the world."

David Crosscup, NSTAR Gas & Electric
Power Industry

be there

"In our global, competitive and volatile business environment, knowing what is happening in real time and having the best tools to drive in the best directions is not optional."

Diane M. Bricco, MeadWestvaco Corporation
Pulp & Paper Industry

"I don't know of any other software that can positively impact every important business driver — environmental, safety, quality and ROI."

Dwight Stoffel, ATOFINA Chemicals, Inc.
Chemical Industry

Get your sites together to make important decisions

Do you have people from different sites using PI? Even if your sites span worldwide, the Users Conference is an ideal place for your PI team to meet, discuss the goals of your PI System infrastructure and get questions answered immediately and firsthand from OSIsoft experts. You'll be armed with the information necessary to make decisions that can help you get the most out of the PI System.

Get in on what gives you the edge — today's company needs PI more than ever

Knowing what is happening in real time and having everyone in the company use the best tools available to visibly navigate in the most optimal direction is what makes companies succeed in any business environment. The PI System provides those tools, for every level throughout the enterprise, giving everyone the power to add something to the bottom line.

Understand technology and you understand how to stay ahead

Our visionary leaders and customers will help you understand the ever-changing landscape of our computing world. See how PI is engineered to keep you and your enterprise in sync with the best technologies available at all times.
